Course Syllabus

Course: English for Medicine **Credits :** NON-CREDIT **Hours:** 45 hrs.

Course Description:

This course is specifically designed for students pursuing careers in the medical field. The course aims to develop students' language proficiency and enhance their communication skills in medical contexts, enabling them to effectively interact with patients, colleagues, and medical professionals from diverse backgrounds. Throughout the course, students will have the opportunity to practice their language skills in realistic medical scenarios, such as medical simulations, role-plays, and case studies. They will receive feedback from instructors to improve their language proficiency and refine their communication abilities.

1. Course Objectives:

By the end of the English for Medicine course, students will have developed the language skills and confidence necessary to communicate effectively in medical settings. Through a combination of interactive lessons, role-plays, and authentic medical scenarios, students will gain the necessary language skills and knowledge to navigate the complex field of medicine with confidence and accuracy. They will be equipped to provide patient care, collaborate with healthcare professionals, and pursue successful careers in the medical field.

2. Learning Outcome:

It is expected that, on completion of this course, the students will be able to:

1. identify and use essential medical terminology, including anatomical terms, medical procedures, diseases, symptoms, and pharmaceutical terms to effectively communicate within the medical field.
2. practice active listening to communicate with patients compassionately.
3. practice the techniques, terminology, and language required to conduct comprehensive medical history interviews.

4. develop their written communication skills by learning how to write medical reports, case studies, patient summaries, and other medical documents.
5. develop their presentation and discussion skills on medical topics.
6. practice language communication skills to navigate diverse cultural perspectives in the medical field.
