Cours: English for Navigation **Credits:**NON-CREDIT **Hours:** 45 hrs.

Course Description:

The course is designed to provide students in the maritime industry with the language skills necessary to effectively communicate in English during navigation and maritime operations. This course focuses on developing proficiency in English while covering essential terminology, communication protocols, and navigational procedures. Throughout the course, students will engage in practical exercises, role-plays, and simulations to apply their language skills in realistic maritime scenarios. They will receive feedback on their performance to improve their communication abilities and build confidence in their maritime English proficiency.

1. Course Objectives:

By the end of the course, students will have developed the language skills and knowledge necessary to communicate effectively in maritime environments. Through interactive lessons, practical simulations, and real-world scenarios, students will enhance their ability to communicate and understand English in various maritime contexts. They will be equipped with language skills to communicate in an English environment such as interacting with maritime authorities, and collaborate with crew members from around the world.

2. Learning Outcome:

It is expected that, on completion of this course, the students will be able to:

1. use essential vocabulary, terms, and terminology specific to navigation and maritime operations to accurately use maritime language in spoken and written communication.
2. demonstrate standard communication protocols including radiotelephony to effectively communicate with shore-based authorities, other vessels, and maritime personnel.
3. implement the correct procedures and phraseology for different types of communications.
4. use their language skills to provide navigational information accurately and precisely.
5. demonstrate the ability to report and interpret weather conditions and forecasts, critical for safe navigation.

6. communicate effectively during emergency situations including distress signals, mayday calls, and safety protocols to ensure swift and efficient response in case of emergencies.
7. recognize the importance of cross-cultural communication in the maritime industry to communicate effectively with crew members from diverse cultural backgrounds to ensure clear understanding.
